INTRODUCTION

Welcome to the fifth weekly literature report from the Public Health England Behavioural Science Reference Cell. This report captures a range of COVID-19 related work in the field of Behavioural Science (mostly) released from the 29th May – 5th June 2020. We have also cross-checked these lists with the Public Health England daily COVID-19 Literature Digest and Daily Alert Report and we are grateful to the work of those teams. The authors of this report do not accept responsibility for the availability, reliability or content of the items included in this report and do not necessarily endorse the views expressed within them.

Please feel free to forward this email to your colleagues. If they would like to opt-in to receive this mailing directly, please contact us at the email address below.

If you have any feedback on this mailing, or content for inclusion in future reports, please email: WNCov.behaviour@phe.gov.uk

HIGHLIGHTS

As we know how time pressured everyone is at the moment, the authors of the digest have selected three recommended items from the lists below. This week these are:

1. Physical distancing, face masks, and eye protection to prevent person-to-person transmission of SARS-CoV-2 and COVID-19: a systematic review and meta-analysis, Derek K Chu et al., The Lancet, 1st June 2020.
2. We are learning a lot, including how to do it better next time, Patrick Vallance, The Telegraph, 30th May 2020.
3. Communication about Coronavirus, David Spiegelhalter, Winton Centre for Risk and Evidence Communication, University of Cambridge, 2nd March 2020.
