Welcome to the monthly Musculoskeletal Health Current Awareness Update (MSKH-CAU), produced by PHE Knowledge and Library Services and the Musculoskeletal Health team. The purpose of this update is to provide the latest research to inform future policy and practice to support the prevention of Musculoskeletal (MSK) conditions.

Public Health England, jointly with NHS England, Versus Arthritis and partners, published the Musculoskeletal Health: 5 Year Prevention Strategic Framework, setting out a clear statement of commitments to promote good MSK health to prevent MSK conditions across the life course. The MSKH-CAU resource will provide evidence and knowledge to support the decisions made by health and social care professionals, the wider public health workforce and employers.

To receive these Current Awareness Updates regularly, sign-up here.

Please note that not all the articles and resources referred to in this alert are freely available. Some articles may require an Athens username and password, and for PHE and NHS staff, these can be obtained here. If you do not work for PHE or the NHS, you may want to approach your local health library service to discuss how you may have access to library services.

We do not accept responsibility for the availability or reliability of the items of content included in this alert and their inclusion is not an endorsement of any views that may be expressed.
