INTRODUCTION

This is the seventeenth weekly literature report from the Public Health England Behavioural Science Reference Cell. The report aims to highlight a selection of COVID-19 related work in the field of behavioural and social science (mostly) released from the 27th August – 4th September 2020. Please note the report is not a perfect product and the inclusion or omission of a publication should not be viewed as an endorsement or rejection by PHE. Additionally, the authors of this report do not accept responsibility for the availability, reliability or content of the items included in this report and do not necessarily endorse the views expressed within them.

Please feel free to forward this email to your colleagues.

If you have any feedback on this mailing, content for inclusion in future reports, or would like to be added to the mailing list, please email: WNCoV.behaviour@phe.gov.uk
HIGHLIGHTS

As we know how time pressured everyone is at the moment, the authors of the digest have selected three recommended items from the lists below. This week these are:

1. **When behavioural science can make a difference in times of COVID-19**, Dario Krpan et al., Behavioural Public Policy, 1\textsuperscript{st} September 2020.

2. **Travel health seeking behaviours, masks, vaccines and outbreak awareness of Australian Chinese travellers visiting friends and relatives—Implications for control of COVID-19**, Tara Ma et al., Infection, Disease and Health, 17\textsuperscript{th} August 2020.

3. **Comparing the psychological response during the COVID-19 pandemic and the Blitz**, King’s College London, 27\textsuperscript{th} August 2020.

RESEARCH PAPERS

**Pre-prints (not peer-reviewed)**

Willingness to pay tuition and risk-taking proclivities among students: a fundamental conundrum for universities, Zafar Zafari et al., medRxiv, 1\textsuperscript{st} September 2020.

Maintaining Compliance when the Virus Returns: Understanding Adherence to Social Distancing Measures in the Netherlands in July 2020, Christopher Reinders Folmer et al., PsyArXiv Preprints, 28\textsuperscript{th} August 2020.
