INTRODUCTION

This is the thirty-ninth weekly literature report from the Public Health England Behavioural Science Reference Cell. The report aims to highlight a selection of COVID-19 related work in the field of behavioural and social science (mostly) released from the 12th February 2021 – 19th February 2021. Please note the report is not a perfect product and the inclusion or omission of a publication should not be viewed as an endorsement or rejection by PHE. Additionally, the authors of this report do not accept responsibility for the availability, reliability or content of the items included in this report and do not necessarily endorse the views expressed within them.

Please feel free to forward this email to your colleagues.

All past editions can be found here: <https://phelibrary.koha-ptfs.co.uk/coronavirusinformation/>, under the 'Keeping up to date' tab.

HIGHLIGHTS

As we know how time pressured everyone is at the moment, the authors of the digest have selected three recommended items from the lists below. This week these are:

1. Public understanding of COVID-19 antibody testing and test results: A qualitative study conducted in the U.K. early in the pandemic, Jan Lecouturier et al., Social Science and Medicine, 16th February 2021.
2. How does exposure to COVID-19 influence health and income inequality aversion?, Miqdad Asaria et al., IZA Institute of Labor Economics, February 2021.
3. Behavioural science may explain vaccine hesitancy, Francesca Tamma, Swiss Re Institute, 15th February 2021.

RESEARCH PAPERS

Pre-prints (not peer-reviewed)

Socio-economic indicators correlate with daily mobility during the second-wave of the COVID-19 pandemic, Jed Long et al., SocArXiv, 2021.

Moderators of changes in smoking, drinking, and quitting behaviour associated with the first COVID-19 lockdown in England, Sarah E. Jackson et al., medRxiv, 17th February 2021.

How can the uptake of preventive behaviour during the COVID-19 outbreak be improved? An online survey of 4827 Chinese residents, Yimeng Mao et al., BMJ Open, 16th February 2021.

Competing motives in a pandemic: affiliative and pathogen-avoidance motives predict (non)compliance with social distancing guidelines, Mitch Brown et al., PsyArXiv Preprints, 13th February 2021.

UNCLASSIFIED

Exploring the association between compliance with measures to prevent the spread of COVID-19 and big five traits with bayesian generalized linear model, Hyemin Han, PsyArXiv Preprints, 13th February 2021.

Association of demographic and occupational factors with SARS-CoV-2 vaccine uptake in a multi-ethnic UK healthcare workforce: a rapid realworld analysis, Christopher A. Martin et al., medRxiv, 13th February 2021.

Stage 2 registered report: Changing health compliance through message repetition based on the extended parallel process model in the COVID-19 pandemic, Jingwen Yang et al., PsyArXiv Preprints, 13th February 2021.

COVID-19 vaccination intent, perceptions, and reasons for not vaccinating among groups prioritized for early vaccination — United States, September and December 2020, Kimberly H. Nguyen et al., CDC, 12th February 2021.

Impacts of school closures on physical and mental health of children and young people: a systematic review, Russell Viner et al., medRxiv, 12th February 2021.

The pandemic fallacy: Inaccuracy of social scientists' and lay judgments about COVID-19's societal consequences in America, Cendri Hutcherson et al., PsyArXiv Preprints, 11th February 2021.

Published

Ideological and psychological predictors of COVID-19-related collective action, opinions, and health compliance across three nations, Becky L. Choma et al., Journal of Social and Political Psychology, 19th February 2021.

Public understanding of COVID-19 antibody testing and test results: A qualitative study conducted in the U.K. early in the pandemic, Jan Lecouturier et al., Social Science and Medicine, 16th February 2021.

International experiences with co-production and people centredness offer lessons for COVID-19 responses, Eva Turk et al., BMJ, 16th February 2021.

COVID-19 prevention behaviours among health staff: data from a large survey in the West of Iran, Saeid Bashirian et al., Journal of Research in Health Sciences, 14th February 2021.

Health-related quality of life of hospitalized COVID-19 survivors: an initial exploration in Nanning City, China, Chenhui Wu et al., Social Science and Medicine, 12th February 2021.

Impacts of the COVID-19 pandemic on animal behaviour and welfare researchers, Irene Camerlink et al., Applied Animal Behaviour Science, 9th February 2021.

COMMENTARIES, STATEMENTS, POSITION PAPERS, AND GREY

LITERATURE

How does exposure to COVID-19 influence health and income inequality aversion?, Miqdad Asaria et al., IZA Institute of Labor Economics, February 2021.

A 'sustainable suppression' strategy for keeping society open, Independent SAGE, February 19th 2021.

Behavioural Insights research to support the response to COVID-19: a survey of implementation in the EU/EEA, European Centre for Disease Prevention and Control, 17th February 2021.

Co-production of knowledge: the future, S. Redman et al., BMJ, 16th February 2021.

Independent SAGE briefing note on use of punishments in the COVID response, Independent SAGE, February 16th 2021.

Safe visiting at care homes during COVID-19: A review of international guidelines and emerging practices during the COVID-19 pandemic, Lee-Fay Low et al., International Long Term Care Policy Network, 19th January 2021.

BLOGS

Girl-led activism in humanitarian crises: Implications for programmes and policymaking in COVID-19, Janina Jochim et al., King's College London, 18th February 2021.

Where's the integration between public health and primary care in the response to COVID-19?, Luisa M. Pettigrew et al., BMJ, 18th February 2021.

UNCLASSIFIED

You're not imagining it: the pandemic is making your hair fall out, Jessica Schiffer, The New York Times, 18th February 2021.

Humour over rumour? The world can learn a lot from Taiwan's approach to fake news, Arwa Mahdawi, The Guardian, 17th February 2021.

COVID-19 vaccination programme: where do people with mental health difficulties lie within the order of priority?, Andrea Cipriani et al., BMJ, 16th February 2021.

Damned if they do, damned if they don't? Public sentiment towards the police during the first lockdown, Geoff Newiss et al., LSE, 16th February 2021.

Crisis or not, the evidence shows that community power works, Grace Pollard, New Local, 16th February 2021.

NHS workers will need help to manage the trauma of the pandemic, Neil Greenberg, The Conversation, 15th February 2021.

Lessons from lockdown: The contributions of behavioural science, School of Psychology and Counselling at the Open University, 15th February 2021.

Time to end assumption that public health interventions encourage risk, Thomas Talhelm, Behavioural Scientist, 15th February 2021.

Behavioural science may explain vaccine hesitancy, Francesca Tamma, Swiss Re Institute, 15th February 2021.

Key workers' dedication takes a toll on their families – here's what employers should do about it, Anica Zeyen et al., The Conversation, 15th February 2021.

Reserve the J&J Vaccine for people who are more likely to engage in high risk activities, Gary Cornell, Black Oak Books Holdings Corporation, 13th February 2021.

Why did a German newspaper insist the Oxford AstraZeneca vaccine was inefficacious for older people—without evidence?, Hristio Boytchev, BMJ, 12th February 2021.

Bacon masks, baby shark, panic buying – behavioural change lessons from COVID-19, James Healy et al., Deloitte, 12th February 2021.

Escaping catch-22 — overcoming COVID vaccine hesitancy, Lisa Rosenbaum, The New England Journal of Medicine, 12th February 2021.
